

What we do at AVL Schrick in Remscheid

Powertrain Engineering

- **Engine design & development** from scratch
- **Hybrid and EV** solutions
- **Gas** applications
- Special niche applications driven by a non conventional **lean approach**
- **Engine testing** and calibration

Energy Systems Development

- **Combined Heat & Power**
- **Waste Heat Recovery** for stationary applications
- **Auxiliary Power Units**

Charging Systems Development

- Conventional **Turbo Chargers**
- E-turbo, e-boosters
- Fuel Cell blowers
- TC for industrial processes
- AVL Schrick own TC (500 HP)

Niche Production

- Engines
- Power generation systems
- Aggregates & Components with high added value in assembly

Vehicle Engineering

- Demo vehicles HY & EV
- Vehicle instrumentation
- Under hood flow simulations
- Vehicle calibration (prototype)
